MEMORANDUM FOR: Mr. Houston

SUBJECT: Intelligence Data Material to Congressional
Committees

I told John Nolan that we had sent to the Vinson and Russell committees some material which contained suggested legislation designed to better protect intelligence data from unauthorized disclosure. I mentioned the work of the USIB Committee and our plan that USIB would probably authorize discussions with the Department of Justice about the proposed legislation. Mr. Nolan saw no reason for the Department of Justice to have been consulted prior to sending the material to the committees. Should there be any premature disclosure of CIA interest in the proposed legislation, however, I suggest we contact Mr. Nolan immediately to make sure no feathers are ruffled.
